MAHMOUD NAZMY

DATA ANALYTICS | BUSINESS INTELLIGENCE | MACHINE LEARNING & AI

Cairo, Egypt | +20 102 603 6685 | mahmoooudnazmy103@gmail.com | linkedin.com/in/mahmoud-nazmy-a408b334a | github.com/mahmoudnazmy48

PROFESSIONAL SUMMARY

Engineering professional and Egyptian Armed Forces officer with a Bachelor's degree in Electrical Engineering (Computer Engineering specialization) from the Military Technical College and a Master's degree in Data Analysis from Cairo University. Background includes command center systems engineering and operational management in food and beverage control and membership services. Skilled in applying structured problem-solving to technical and operational challenges, with developing capabilities in Python, SQL, Power BI, data analytics, and machine learning. Currently studying Machine Learning through the Digital Egypt Pioneers Initiative (DEPI) and building practical projects to apply data-driven methods to real-world problems.

TECHNICAL SKILLS

Data Analytics: Data cleaning, exploratory data analysis (EDA), data preparation, statistical analysis, customer segmentation, churn analysis

Business Intelligence: Power BI, DAX, Excel, data visualization, KPI reporting, dashboard development

Programming and Data: Python, SQL, R, relational database concepts

Databases and Applications: Microsoft SQL Server, database design, Flutter, Dart, JSON

Machine Learning: Supervised learning fundamentals, regression, classification, feature preparation, model evaluation

AI and Deep Learning: Neural network and deep learning fundamentals; currently developing practical skills

TECHNICAL PROJECTS

Gate Access and Point-of-Sale Management System | SQL Server, SQL

Designed a relational database structure for gate operations, ticket sales, membership records, and operational reporting. Defined relationships, constraints, and business rules to support data integrity and consistent recordkeeping.

Interactive Digital Navigation System | Flutter, Dart, JSON

Developed an interactive navigation application for a hospitality environment, structuring map locations, buildings, and navigation connections using JSON data.

Data Analytics and Business Intelligence Projects | Python, SQL, Power BI, DAX, Excel, R

Worked on data preparation, exploratory analysis, visualization, KPI reporting, and analytical use cases including customer segmentation and churn analysis. Project details and implementation should be reviewed in the linked GitHub repositories.

PROFESSIONAL EXPERIENCE

Egyptian Armed Forces | Lieutenant Colonel Engineer

Command Center Systems Engineer

Worked with command center systems in an engineering role, applying technical knowledge and structured troubleshooting to system-related requirements and operational challenges.

Department Manager – Food and Beverage Control | Dar Al Defaa Al Gawy

Managed food and beverage control activities and related operational workflows. Coordinated with relevant departments, monitored day-to-day activities, and supported adherence to procedures and service standards.

Department Manager – Memberships and Subscriptions | Dar Al Defaa Al Gawy

Managed membership and subscription operations, coordinated administrative workflows, and oversaw membership-related records and transactions. Supported service delivery, operational continuity, and improvements to administrative processes.

EDUCATION

Master's Degree in Data Analysis | Cairo University, Egypt

Bachelor's Degree in Electrical Engineering, Computer Engineering Specialization | Military Technical College, Egypt

PROFESSIONAL DEVELOPMENT

Digital Egypt Pioneers Initiative (DEPI) – Machine Learning Track

Currently studying machine learning concepts, algorithms, data preparation, and model evaluation through structured training and practical exercises.
